ULTRASOUND GASTROVIDEOSCOPE

TGF-UC180J

Forward-Viewing Ultrasound Gastrovideoscope Creates Pioneering New Opportunities in EUS-guided Treatment.
NEW, FORWARD-VIEWING ULTRASOUND GASTROVIDEOSCOPES RAISES THE STANDARD OF EUS-GUIDED TREATMENT.

OLYMPUS takes pride in its track record of providing highly effective solutions in ultrasound-gastrovideoscope design. Convex-array-type instruments are increasingly considered the instrument of choice, and as the industry leader, OLYMPUS has focused all its expertise and accumulated know-how into the revolutionary new design of this forward-viewing ultrasound gastrovideoscope, expanding the treatment options for users with a focus on interventional EUS procedures. The remarkable potential of this cutting-edge OLYMPUS product will bring new benefits to your EUS practice and patient care.

**TGF-UC180J**

**Conventional convex type**

Small portion of the scope for maneuverability.

**Needle Elevator**

Needle and elevator are extended at the same time.

**Straight Channel Port**

Reduced resistance provides greater puncture force and increased control over endotherapy devices.

**Shorter Distal End**

A shorter, rigid portion enhances the maneuverability of the scope’s distal tip in the digestive tract.

**Auxiliary Water Channel**

This flushes away blood and residue inside organs for a clear view at all times and eliminates the need for a balloon.

**Endoscopic Image**

B-mode

B-mode (EUS-FNA)

COLOR FLOW mode

**OLYMPUS Endoscopic Ultrasound Center EU-ME2**

Providing compatibility with linear and radial ultrasound endoscopes and radial ultrasound miniature probes.

Olympus’s EU-ME2 is a high-quality, compact ultrasound processor designed to fit in an endoscopic trolley and is designed for use with the Olympus endoscopic and endobronchial ultrasound equipment. Apart from its superb image quality, the EU-ME2 Premier Plus incorporates the latest technologies, such as Tissue Harmonic Echo, Contrast Harmonic EUS (1), and Elastography.

---

**Hitachi Aloka Medical Ultrasound System ProSound F75**

Providing compatibility with linear and radial ultrasound endoscopes and extracorporeal probes.

As a high-end ultrasound system, the ProSound F75 supports various scan methods and gives you a wide variety of imaging capabilities to meet your high-quality imaging needs. The system provides both the compatibility with Olympus linear or radial ultrasound endoscopes and also extracorporeal probes. The latest technologies, such as Broadband Harmonics (BbH), Contrast Enhancement (CE) (1), and Elastography, are supported.

*Regulations and usage of ultrasound contrast agents vary according to the country where they are used and the type of agents. Please use the ultrasound contrast medium according to the instructions that are provided with the products."
Endoscope Functions

**Optical system**
- Field of view: 120°
- Direction of view: Forward viewing
- Depth of field: 3 to 100 mm

**Insertion tube**
- Distal end, outer diameter: 14.6 mm
- Distal end enlarged
- 1. Objective lens
- 2. Air/water nozzle
- 3. Ultrasound transducer
- 4. Instrument channel outlet
- 5. Auxiliary water channel outlet
- 6. Light-guide lens
- Insertion tube, outer diameter: 12.6 mm
- Working length: 1,245 mm

**Instrument channel**
- Channel, inner diameter: 3.7 mm
- Minimum visible distance: 5 mm from the objective lens
- Direction from which endotherapy accessories enter and exit the endoscopic image

**Bending section**
- Angulation range
  - Up 180°
  - Right 90°
  - Down 90°
  - Left 90°

**Total length**: 1,560 mm

Ultrasound Functions

**Model**
- With EU-ME 2 Premier Plus
- With ProSound F75

**Operation mode**
- B-mode, THE mode, H-FLOW mode, COLOR FLOW mode, POWER FLOW mode, PW mode, Flow mode, Powerflow mode, and CH-EUS mode, and CH-EUS mode (Elastography)
- B-mode, M-mode, D-mode, Flow mode, Powerflow mode, and CH-EUS mode (Elastography)

**Scanning method**: Electronic, curved linear array

**Scanning direction**: Parallel to the insertion direction

**Frequency**
- 5, 6, 7.5, 10, 12 MHz
- 5, 6, 7.5, 10 MHz

**Scanning range**: 90°

**Contacting method**: Sterile-deaerated-water-immersion method, direct-contact method

Selection of Needles for Various Styles and Requirements

The variably sized, versatile EZ Shot 2 is compatible with OLYMPUS ultrasound endoscopes designed for EUS-guided FNA. It is available in 19 G, 22 G, 25 G and 22 G with a side port to allow aspiration from the needle’s distal tip and side. The all-in-one EZ Shot 2 has everything needed for effective FNA including a unique dimpled design that is clearly visible in ultrasound images.

*The EZ Shot (NA-200H-8022) is not compatible with the TGF-UC180J.*

Ultrasound Cable

**MAJ-2056**

The cable’s detachable design makes the ultrasound endoscope easy to handle, reprocess, and store.

Specifications, design, and accessories are subject to change without any notice or obligation on the part of the manufacturer.
