## Medical Expert Training in Office-based Phonosurgery

Among phonosurgical procedures in patients with benign lesions of the larynx, office-based interventions, including laser surgery, have reached a level of high standard and are nowadays considered as the first-choice treatment for various disorders. This hands-on training course offers lectures about diagnostic and surgical techniques for various disorders of the larynx as well as video presentations of typical cases.

## Medical Expert Training in NBI Endoscopy in the Management of the UADT Tumors

With a session focused on in-office laryngeal surgery supported by theoretical lessons and live clinical cases, this theoretical and practical course aims at interpreting the physical characteristics, methods, and diagnostic advantages of NBI technology and is a valid means for quickly learning how to interpret the vascular pattern typical of neoplastic and preneoplastic lesions.
