ENDOBASE NEXT reliably gathers and links all significant data for the endoscopy department and gives access to relevant information in associated systems.

**Smart Update**
For remote maintenance without downtime of ENDOBASE NEXT.

**Patient Scheduling**
The system provides a convenient overview of the scheduled patients for planning the day in the department.

**Increase Safety: Scope Management**
Should an endoscope be planned for an examination despite possible damage or insufficient reprocessing, ENDOBASE NEXT will recognize this and raise an alert.

**Simplified Reporting**
Documentation of the procedure and findings using ENDOBASE NEXT is simple, quick, and consistent.

**Disinfection, Drying, and Storage**
Reprocessing equipment recognizes and registers the endoscopes, and automatically transfers the reprocessing protocols to ENDOBASE NEXT.

**Manual Cleaning**
Process steps carried out manually, for example pre-cleaning, can be assigned and marked as completed in the documentation system.

**Procedure**
Pre-Procedure
Post-Procedure

**A SINGLE DOCUMENTATION SYSTEM FOR THE WHOLE ENDOSCOPY WORKFLOW**
