

PTSA-02 Short Arm for underwater flash unit

- Short arm to mount an underwater Flash on the underwater case
- 2-axis adjustment of the flash for accurate illumination of the underwater scenery

Flash holder

The short arm PTSA- 02 is needed to adapt external underwater flash units to the underwater case or to the flash bracket. The rotatable part of the short arm allows a precise adjustment of the flash for macro photography, as well as an accurate illumination of the underwater world.
