

MCON-P02 Macro Converter

- Takes striking photos of close-up objects
- Combine with the Macro Arm Light for macro perfection
- Turns your kit lens into a master of macro shots

Get a macro view for your PEN

If you like to take pictures of flowers, insects or stamps - or anything small - then this converter is right for you. Using your existing lens or lenses, you can extend the field of view to take stunning macro- style pictures with impressive detail and interesting perspectives. Use the macro converter with the Macro Arm Light (MAL-1) for perfectly controlled lighting of your macro shots.
